

I would prefer to not leave Joan here alone. But I feel much better, because I am leaving her in the very good and capable hands of the best nurses I have ever met.

For more than thirty years I have worked in hospitals and never have I experienced so many well trained, disciplined, efficient and loving and caring nurses. I would like to bring them all back to the USA !!!! (Also, They are very beautiful !)

The doctors are excellent. They are true experts in the discipline of Traditional Chinese Medicine, and are quite confident and assuring.

---

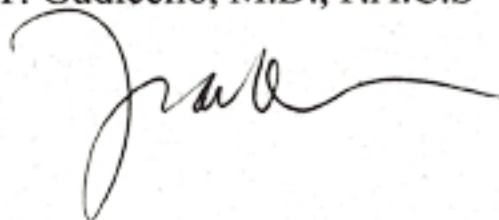

The Foreign Affairs Office has made this visit most commodious. Translation assistance of course is invaluable.

The staff of the China Connection is to be commended for their irreplaceable guidance.

Joan made an excellent decision to come to Tianjin Hospital of Traditional Chinese Medicine. I wish that I could stay longer and observe all that acupuncture can accomplish. I am cured of my lifelong nasal sinus problem. I would also be able to observe Joan's progressive improvement, which I know in time will come with all your dedication and expertise.

Sincere thanks and warmest regards,

Frank P. Gudicello, M.D., F.A.C.S
